Education

- **Industrial University of Ho Chi Minh City (2022 - Present)**
Software Engineering

Skills

- **Programming Languages:** Java, C, JavaScript (ES6+)
- **Backend Development:** Spring Boot, Spring Data JPA, RESTful API
- **Frontend Development:** React, TailwindCSS, Bootstrap, HTML5/CSS3, Axios
- **System Architecture & Middleware:** Microservices Architecture, Distributed Systems, Event-Driven Architecture, API Gateway, RabbitMQ, WebSockets
- **Databases & Caching:** SQL (MySQL/PostgreSQL), NoSQL (MongoDB), Redis
- **Cloud & DevOps:** Docker, AWS S3
- **Tools:** Git, Postman

PERSONAL PROJECT

- **DepLao Premium**

Role: Full-stack Developer

Description:

A cross-platform multi-device OTT messaging application system inspired by Zalo, designed using a distributed Polyglot Microservices architecture.

Tech Stack:

React 19, TypeScript, TailwindCSS, Node.js (Express), Socket.io, WebRTC, MongoDB.

Key Responsibilities & Features:

- **Core UI Development:** Built the responsive web client using React, TypeScript, and TailwindCSS.
- **Real-time Messaging:** Integrated WebSockets (Socket.io) to deliver instant 1-1 and group messaging under 500ms, handling real-time typing indicators, message status tracking (Sent/Delivered/Read), and emojis.
- **WebRTC Voice/Video Calls:** Implemented the web-side signaling and user interface for P2P voice and video calls, supporting stable 1-1 and group conference meetings.
